

HR Analytics Dashboard Summary

Project Overview

Developed an interactive **HR Analytics Dashboard** in **Tableau** to analyze employee attrition, workforce demographics, job satisfaction, and key HR performance metrics. The dashboard enables HR leaders and business stakeholders to monitor workforce trends, identify high-risk employee segments, and support data-driven workforce planning and employee retention strategies.

Business Objective

Employee attrition is a critical business challenge that directly impacts recruitment costs, productivity, employee morale, and organizational performance.

The objective of this dashboard is to:

- Monitor workforce KPIs in real time
- Identify employee attrition patterns
- Analyze demographic and departmental trends
- Evaluate employee satisfaction across job roles
- Support strategic HR decision-making through interactive visualizations

Dashboard KPIs

KPI	Value
Total Employees	1,470
Attrition Count	237
Attrition Rate	16.12%
Active Employees	1,233
Average Employee Age	37 Years

Dashboard Components

The dashboard includes the following analytical views:

- Overall Workforce KPIs
 - Department-wise Attrition Analysis
 - Employee Age Distribution
 - Job Satisfaction Analysis by Role
 - Education Field-wise Attrition
 - Gender-wise Attrition Analysis
 - Age Group & Gender Distribution
 - Interactive Workforce Overview
-

Key Insights

Workforce Overview

- The organization consists of **1,470 employees**, with **237 employees** having left the company.
 - The overall employee attrition rate is **16.12%**, indicating opportunities to improve employee retention.
-

Department-wise Attrition

- The **Sales** department experiences the highest employee attrition.
- Research & Development follows as the second-largest contributor.
- Human Resources records the lowest attrition.

This suggests that retention initiatives should primarily focus on customer-facing departments.

Employee Demographics

- The largest employee population falls within the **30–35 year** age range.
- Younger employees contribute a significant portion of employee turnover.
- The average employee age is **37 years**.

These patterns indicate that early and mid-career employees may require stronger engagement and career development initiatives.

Gender Analysis

- Employee attrition is higher among **male employees** compared to female employees.
- Across multiple age groups, male employees consistently represent a larger share of total attrition.

This insight can support targeted workforce engagement strategies.

Education Analysis

Employees with educational backgrounds in **Life Sciences** represent the highest number of attrition cases, followed by:

- Medical
- Marketing
- Technical Degree

Understanding attrition by education field can help HR teams develop more focused retention programs.

Job Satisfaction Analysis

The dashboard provides job satisfaction ratings across multiple job roles, enabling HR teams to:

- Identify roles with lower satisfaction levels
- Compare satisfaction trends across departments
- Prioritize employee engagement initiatives

Job satisfaction is a key leading indicator for employee retention.

Business Impact

This dashboard enables HR teams to:

- Monitor workforce health using real-time KPIs
 - Identify departments with high employee turnover
 - Analyze workforce demographics for strategic planning
 - Understand employee satisfaction across job roles
 - Support evidence-based HR decision-making
 - Improve employee retention strategies
-

Strategic Recommendations

1. Strengthen Employee Retention Programs

Develop targeted retention initiatives for departments experiencing the highest employee attrition, particularly Sales and Research & Development.

2. Improve Employee Engagement

Implement employee engagement surveys and career development programs for employees in the early stages of their careers.

3. Monitor Job Satisfaction

Regularly review job satisfaction metrics and identify roles requiring additional managerial support or workplace improvements.

4. Workforce Planning

Use demographic insights to anticipate future workforce needs and improve succession planning.

5. Build Predictive HR Analytics

Extend the current dashboard by incorporating predictive analytics and machine learning models to identify employees at high risk of attrition.

Tools & Technologies

- Tableau Desktop
 - Microsoft Excel
 - Data Visualization
 - Dashboard Design
 - KPI Development
 - HR Analytics
 - Business Intelligence
-

Conclusion

This interactive HR Analytics Dashboard transforms employee data into actionable business insights by combining workforce KPIs, demographic analysis, attrition trends, and job satisfaction metrics within a single executive dashboard. It demonstrates the practical application of Tableau for business intelligence, enabling organizations to make informed, data-driven decisions that improve employee retention and workforce performance.
